MD RIAJ

Senior Software Engineer

Dhaka, Bangladesh · contact.riaj@gmail.com · +880 1798 691956
riaj.dev · linkedin.com/in/msriaj · github.com/msriaj

SUMMARY

Full-stack engineer with 6 years building web products — three at COdesign, promoted twice from frontend engineer to senior, and three years freelancing before that (30+ projects, clients in 10+ countries). Comfortable owning the whole stack: Next.js/Nuxt frontends, Django and NestJS APIs, PostgreSQL, and Docker/Nginx infrastructure. Delivered work for Shanta Holdings, Toyota Bangladesh and SAJIDA Foundation, and lead code review and technical direction for the engineering team.

EXPERIENCE

COdesign Ltd. · Dhaka · 2023 – Present
Senior Software Engineer · 2026 – Present
Software Engineer (Full-stack) · 2024 – 2026
Software Engineer (Frontend) · 2023 – 2024

- Shipped 15+ client applications from frontend to database and deployment; 13 are live today.
- Architected the authentication and access-control stack (JWT, RBAC, audit logging) reused on new projects, so each one starts from a proven, secure base instead of rebuilding auth.
- Lead code review for all frontend and backend PRs and mentor junior developers; introduced PR templates, lint and format rules, CI checks and a branching convention the team now uses on every project.
- Manage the hosting for every live client site on DigitalOcean and Vultr — Docker, Nginx, SSL and GitLab CI/CD pipelines — including server setup, deployments and incident troubleshooting.
- Convert client requirements into architecture, API contracts and task breakdowns for frontend, backend and QA.

Freelance Web Developer · 2020 – 2023 · 30+ projects, 10+ countries, 5.0 rating

SELECTED PROJECTS

Runtime — Project & Work Management Platform
Next.js · TypeScript · Node.js · Prisma · PostgreSQL · Redis · Docker
Internal ClickUp-style platform used daily by about 50 employees.

- Designed the Space > Folder > List > Task data model and API contracts, supporting 4-level nesting with list views loading in under 300 ms.
- Developed the task, status and workflow modules — schema, REST API and UI — and released them into everyday use.
- Established the component and API patterns that became the template for later projects.

1United — Esports Tournament Platform · 1united.gg
Next.js · TypeScript · Material UI · Docker · GitLab CI/CD

- Engineered the full frontend — multi-step registration, OTP verification, JWT auth and role-based access — serving 5,000+ registered players.
- Automated deployments with Docker staging/production environments and GitLab CI/CD, replacing manual deploys with fully automated pipelines.

Magnify Partners — Corporate Site with 3D Experience · magnify.partners · Lisbon, Portugal
Three.js · WebGL · GSAP · Nuxt

- Created the site's complex WebGL and Three.js animations — interactive 3D scenes tied to scroll and pointer — for a Portuguese investment and advisory firm.
- Optimised geometry, textures and render loops so the 3D experience stayed smooth on mobile devices.

Multi-Site Content & Automation Platform
Nuxt · Node.js · PostgreSQL · Docker · Nginx · AI APIs

- Designed a single backend that provisions and manages multiple content sites and domains through automated Docker and Nginx reverse-proxy setup.
- Integrated AI-assisted content generation into the editorial workflow so new sites can be populated and launched without a content team.

Enterprise & institutional clients
Shanta Holdings · Toyota Bangladesh (Navana) · SAJIDA Foundation · Transcom Group · Golden Group · Niraan

- Delivered corporate and institutional websites for Bangladesh's leading luxury real-estate developer (Shanta Holdings), a national NGO serving 6 million people a year across 400 offices (SAJIDA Foundation), and Navana Limited, Toyota's official distributor in Bangladesh from 1964 to 2025.
- Launched niraan.com as a headless Shopify storefront with a custom Nuxt frontend and an integrated CMS for non-commerce content.
- Handled CMS architecture (Wagtail/Django), API integrations, responsive Nuxt/Next.js frontends, performance optimisation, go-live and ongoing support for these organisations.

SKILLS

Backend & data: Python, Django, Wagtail, Celery, Node.js, NestJS, Express, PostgreSQL, Prisma, Redis, Firebase
Frontend: TypeScript, React, Next.js, Vue, Nuxt, Tailwind CSS, Material UI, GSAP, Three.js/WebGL
DevOps: Docker, Nginx, Linux, GitLab CI/CD, GitHub Actions, DigitalOcean, Vultr, Cloudflare
Architecture & CMS: System design, API & database design, JWT/RBAC, audit logging, WordPress, headless Shopify

EDUCATION

Diploma in Computer Engineering — Shyamoli Ideal Polytechnic Institute, 2020

ADDITIONAL TRAINING

Three.js Journey — WebGL & Three.js
